DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3, 5, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watanabe et al (2001/0016522). Regarding claim 1, Watanabe discloses a golf ball comprising a core, an intermediate layer, and cover layer. The Shore D hardness of the cover layer is larger than the hardness of the intermediate layer (abstract). The ration of the deflection of the intermediate ball and the core is from 0.9 to 0.970 (abstract). The thickness of the intermediate layer from 0.2 to 2 mm and the cover layer thickness is from 1.6 to 2.3 mm (para. 29, 35). Since the properties as listed above fall within applicant's range the initial velocity will also fall within applicant's range. Regarding claim 2, the cover layer thickness is from 1.6 to 2.3 mm and a Shore D hardness from 60 to 68 (para. 35, 36). The thickness of the intermediate layer from 0.2 to 2 mm and the Shore D hardness is from 45 to 55 (para. 27, 29). Since the properties as listed above fall within applicant's range the initial velocity will also fall within applicant's range. Regarding claim 3, the melt flow rate is obvious over Watanabe since the cover materials are identical. The present invention and Watanabe disclose Himilan 1706 and 1605 for cover materials. Regarding claims 5 and 7, since applicant

claims ingredients B and a-1 or a-2 in zero amounts Watanabe satisfies the limitation by disclosing olefin-based elastomers for the intermediate layer (para. 24). One of ordinary skill in the art would vary the dimensions and properties for enhanced performance.

Allowable Subject Matter

Claims 4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 4-4-05 have been fully considered but they are not persuasive. Applicant is required to submit a signed copy of the declaration for consideration. With respect to the initial velocity of the sphere and core of the golf ball, applicant's arguments are not persuasive. While it is clear the prior art does not disclose the claimed property the deflection amounts for the sphere and the core are within the ranges claimed by applicant. It is not clear why the initial velocity would not also fall within applicant's range since the two layers of each ball appear to be very similar.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raeann Gorden whose telephone number is 571-272-4409. The examiner can normally be reached on M-F 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Greg Vidovich can be reached on 571-272-4415. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
